## Welcome

On behalf of EuCheMS and ANQUE, we invite you to explore our comprehensive array of sponsorship packages for the 6<sup>th</sup> EuCheMS Chemistry Congress 2016 in Seville, Spain.

Recognized as the European leading event focused on Chemistry, the 6<sup>th</sup> EuCheMS Chemistry Congress 2016 offers exceptional opportunities to promote your brand and reinforce your industry leadership.

With a theme of Chemistry: Shaping the Future, the program will feature five days of scientific and technical sessions, plenary lectures, keynote speakers, oral and posters communications, roundtable discussions and workshops, unparalleled networking opportunities, an exhibition and a unique social program. That is why the 6<sup>th</sup> EuCheMS Chemistry Congress is the place to be in 2016.

Sponsorship packages are designed to give you outstanding visibility on-site, leading up to the Congress through our extensive pre-event marketing campaign, and also post-Congress. We invite you to learn more about these exceptional opportunities and look forward to seeing you in Seville!

## About EuCheMS Congresses

European Chemistry Congresses are the most relevant events for the European Chemistry community. Chemists from all parts of Europe, come together to present and discuss the latest achievements in cutting edge chemical sciences. There is no other occasion where chemists from different countries, all areas of chemistry and various professional backgrounds can converge in one place.

EuCheMS congresses are unique fora to foster transnational exchange and collaboration, to encourage dialogue between the different branches of chemistry, to bring academia, industry and decision makers together and to emphasize the impact of chemistry and chemical research in our society. Special attention is given to all activities which help promote careers of young scientists.

A high level Scientific Committee and a strongly committed Organising Committee ensure the highest possible quality of each congress. The scientific contributions include 8 plenary lectures offered by top class world scientists and Nobel Laureates, over 100 invited speakers and around 2,000 scientific communications which conform a geographically and thematically balanced program of exciting cutting edge chemistry.

Since the first EuCheMS congress in 2006, this biennial "family gathering" of European Chemists has been successfully organised in five editions: 2016 is the turn for Seville, Spain, a location that offers a world class venue, attractions and cultural activities and that offers the opportunity to visit one of the world's most wished for destinations.

*The 6<sup>th</sup> EuCheMS Congress is the most prestigious and best attended venue for stakeholders engaged in all aspects of Chemistry.*

## About the organizers

### About EuCheMS

EuCheMS is a non-profit organisation founded in 1970. Its object is to promote co-operation in Europe between non-profit scientific and technical societies in the field of chemistry and molecular sciences. EuCheMS has 42 member societies which together represent more than 150,000 chemists in academia, industry, government and professional organisations in 31 countries across Europe. EuCheMS has several Divisions and Working Groups which cover all areas of chemistry and bring together world class expertise in the underpinning science and development needed for innovation.

EuCheMS is based in Brussels and incorporates the role and responsibilities of the former Federation of European Chemical Societies and Professional Institutions (FECS) which adopted the name EuCheMS in 2004.

The activities of EuCheMS, as a supranational organization, are focussed on:

- Increasing the visibility of Chemistry at the European level by speaking with a single voice,
- Creating a European "corporate identity" among Chemical Societies",
- Presenting chemistry as an essential and indispensable provider of solutions for global challenges to European and international institutions and other relevant stakeholders.

Strengthening the position of chemistry in Europe can only be achieved by combining forces. The work of EuCheMS rests on three pillars which are supposed to complement national activities of the Member Societies on a transnational level: networking, European chemistry congresses and policy development.

### About ANQUE

With over 70 years of history, ANQUE is today a prestigious professional association with over 9,000 members. It is the largest association of Spain, headquartered in Madrid and with local offices in all Spanish Autonomous Communities.

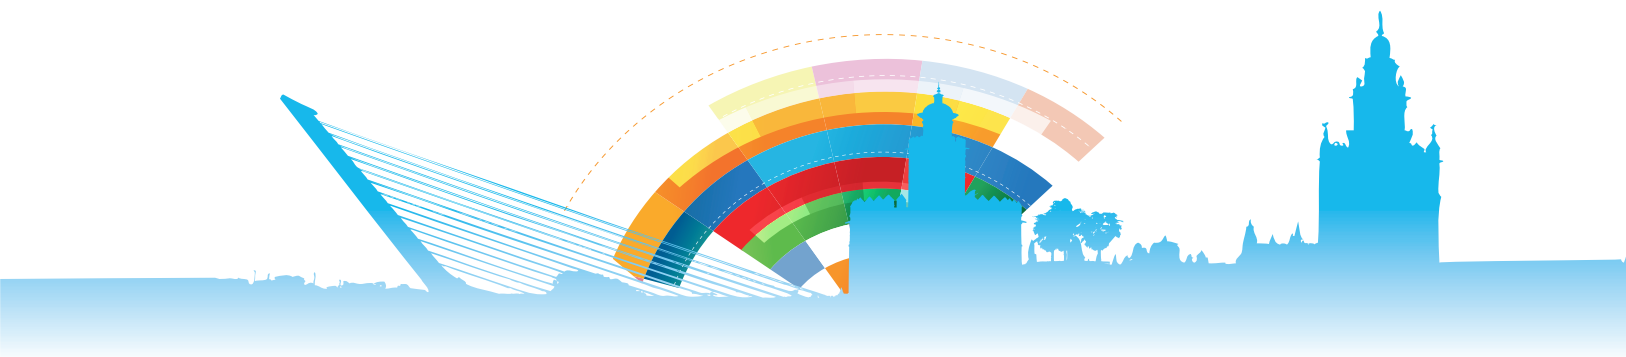

ANQUE offers a portfolio of unique services and benefits to its members and works to strengthen Chemistry & Chemical Technology and their professionals in Spain.

ANQUE's mission is to be the Spanish voice of Chemistry and Chemical Technology and defend the interests and image of the profession, raise the scientific and professional profile and achieve greater recognition through social awareness while representing the hub of its members interdisciplinary network before public authorities

ANQUE aims to boost its network in all areas -scientific, technical, social, economic and cultural- both nationally and internationally.
